The Sound Wave Symposium 2012
October 12th and 13th, 2012
San Diego Marriott Mission Valley
8775 Rio San Diego Dr., San Diego, CA 92108

AGENDA DAY ONE

7:30   Registration and Continental Breakfast
8:00   Welcome
8:15   Brain Plasticity and Speech Perception
8:45   Break
9:00   NICU Notes: Nitric Oxide, Hearing Loss, and Stress Relief through Music
10:00  The Challenge of Managing Down Syndrome Ears
11:45  Inflammatory Bone Destruction Resulting from Otitis Media and Cholesteatoma
12:00  Lunch
1:00   Microtia and Atresia: what to think about and when to refer
1:30   CMV and Meningitis: Audiologic Manifestations
2:00   Otitotoxicity Assessment with Cisplatin, Chemotherapy and Radiation
2:45   Break
2:55   Chemotherapy Dosing and Otoxicity Monitoring Protocols
4:25   Break
4:35   Music for the Development of Auditory Skills
6:00   Reception

AGENDA DAY TWO

Registration and Continental Breakfast
Welcome
Musicians and Hearing Aids
Noise Exposure, Personal Hearing Devices and Hearing Protection
Break
Bone Anchored Devices
Auditory Neuropathy Spectrum Disorder: Diagnosis & Amplification Strategies
Lunch
Auditory Neuropathy Spectrum Disorder: Diagnosis & Amplification Strategies (cont.)
Clinical Grand Rounds: Amplification
Break
Programming Hearing Aids for Different Languages
Practical Solutions to Challenging Amplification Issues
Adjourn

OBJECTIVES

The changing face of healthcare today reveals new challenges in diagnosing and treating hearing loss. With the advanced tools and technology available today, clinical audiologists are required to have a more in-depth knowledge of electrophysiology and neuronal anatomical development, genetic and syndromic anomalies, ototoxic (including noise) and otoprotective agents, as well as (re)habilitative strategies.

Our speakers will give a unique perspective on the anatomical intricacies that affect the auditory system, ototoxicity monitoring and otoprotection, and amplification strategies. In addition, unique case histories will be presented, as well as a panel discussion for managing challenging fitting situations. Throughout, the influence of music in brain development, auditory perception, and amplification will be infused into the discussion.

CONTINUING EDUCATION

This program is offered for up to 1.55 CEUs (Intermediate level, Professional area).

Rady Children’s Hospital-San Diego is pending approval by the American Academy of Audiology to offer Academy CEUs for this activity. The program is worth a maximum of 1.55 CEUs. Academy approval of this continuing education activity does not imply endorsement of course content, specific products, or clinical procedures.

Rady Children’s Hospital San Diego is pending approval by the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SPLAHADB) to offer CEUs for this activity. The program is worth a maximum of 1.55 CEUs of which 7 hours are specific to Hearing Aid Dispensing hours.

Presents:
Musical Waves: Neurobiology, Perception & Amplification

October 12-13, 2012

TARGET AUDIENCE
This course is designed for audiologists in all practice settings who treat pediatric as well as adult populations. This course will prove valuable in the day-to-day practices of physicians, hearing aid dispensers, speech pathologists, early interventionists, nurse practitioners and physician assistants involved in hearing-related issues.
